OBJECTIVE

Computer Science graduate with experience developing application in an Agile environment. Skilled in building scalable, data-driven applications using frontend frameworks and backend integrations. Seeking a General Software Engineer role to contribute to robust systems while continuing to grow across the full software development lifecycle.

EDUCATION

SIM - UNIVERSITY OF WOLLONGONG, SINGAPORE

BACHELOR IN COMPUTER SCIENCE
(GAME AND MOBILE DEVELOPMENT)
Grad. Apr 2025 || GPA: 3.27 / 4.0

SINGAPORE POLYTECHNIC
DIPLOMA IN APPLIED DRAMA AND
PSYCHOLOGY
Grad. Feb 2020

COURSEWORK

BACHELOR

Software Development Methodologies
Database Systems
Data Management and Security
Mobile App Development
Virtual and Augmented Reality

DIPLOMA

Research and Ethics
Psychology
Forum Theatre

SKILLS

PROGRAMMING

C++ • CSS • HTML • Java • JavaScript •
Kotlin • Python • SQL • Typescript

SOFTWARE

Android Studio • Docker • Flutter •
GitHub • MySQL Workbench • NetBeans
• OpenGL • Postman • Procreate • React
• Tailwind CSS • Unity

GENERAL

Proficient in English and Chinese • Agile
and Scrum • Project Management •
Research Skills • Psychology (Specialized
in Community, Education, Lifespan and
Social) • Event Facilitation

EXPERIENCE

ST ENGINEERING | SOFTWARE ENGINEER

Aug 2025 – Present | Singapore

- Developed multiple web applications using React and Tailwind CSS for data visualization, whilst leveraging structured datasets to support real-world decision making
- Implemented authentication, database integration, and API consumption within a team-based Agile environment
- Containerized applications using Docker to improve deployment consistency and development efficiency

BEYOND SOCIAL SERVICE | COMMUNITY WORKER INTERN

Nov 2020 – Feb 2021 | Singapore

- Conducted regular outreach visits to rental flat communities to check in on residents' well-being and identify support needs
- Assisted in planning and executing community programmes including food drives and youth enrichment activities

PROJECTS

SG ELECTION APPLICATION

Dec 2025 | ST Engineering, Singapore

- Built a responsive web application visualizing historical Singapore election data
- Implemented constituency-level and party-level breakdowns for improved data clarity (Visualized with Table and Map Breakdown)
- Focused on usability and clear data presentation for non-technical users

KANBAN BOARD WEB APPLICATION

Sep 2025 - Nov 2025 | ST Engineering, Singapore

- Work in a team to build a responsive Kanban Board application in an Agile Settings
- Implemented authentication for security and roles with different responsibility in handling Task on the board.
- Focused on ease-of-use, security and transparency in Task Management.

TEXT-BASED ADVENTURE GAME

Jan 2025 – Feb 2025 | Personal, Singapore

- Built a narrative-driven text adventure game featuring multiple endings and player-driven choices
- Implemented game logic, state tracking, and conditional outcomes using Twine scripting
- Delivered a complete, playable game within a short Game Jam timeframe, demonstrating rapid prototyping and scope management

ROGUE-LITE DUNGEON CRAWLER

Jul 2024 – Dec 2024 | SIM-UOW, Singapore

- Developed a Unity-based rogue-lite dungeon crawler featuring randomized gameplay elements and replayable mechanics
- Designed and coordinated core systems including gameplay flow, documentation, narrative structure, and modular logic
- Supported long-term scalability and replayability through system modularization and controlled randomization
